RE: APPRECIATION FOR INSTALLATION OF SILAB LABORATORY INFORMATION MANAGEMENT SYSTEMS AND TRAINING

The Veterinary research institute of Kenya agricultural and livestock research organisation (KALRO) wishes to acknowledge the good work that was done by your IT experts Drs Del Negro, Patrizia Colangeli and Fabrizio Quaranta on installation of the Laboratory Information Management System (SILAB), training our staff on the use and verification of the system.

The program that was installed is now working at the veterinary research institute, Muguga and our staff are able to log in results and generate reports. As we continue with our operations, we request for your valuable support and collaboration even as KALRO hopes to expand the program to its other labs.

Kind regards,

Dr Monicah W Maichomo,
Director, Veterinary science research institute.
