H2020 ONLINE MANUAL

Find the European Union funding opportunities and search for new or closed calls, grouped by the following programmes:

- **Horizon 2020 - EU research funding from 2014**
- **Seventh Framework Programme (FP7)**
- **Competitiveness and Innovation Framework Programme (CIP)**
- **other research and innovation programmes**

Horizon 2020

Horizon 2020 is the new EU funding programme for research and innovation running from 2014 to 2020 with a €70 billion budget. The first calls for proposals for Horizon 2020 are envisaged for **December 2013**. Its simplified rules and submission and grant management tools should facilitate participants' tasks. For practical guidance, see the [H2020 online manual](#).

H2020 supports **SMEs** with a new **instrument** that runs throughout various funded research and innovation fields, so it should be easy for SMEs to find opportunities in many calls.

H2020 also aims to enhance EU [international research cooperation](#) so there are more opportunities for Third Country participation.

FP7 and CIP - previous programmes

FP7 and CIP are previous instruments to fund research and innovation activities in Europe for the period 2007 to 2013. You can view closed calls information of these programmes.

COSME

Programme for the Competitiveness of Enterprises and SMEs (COSME) will run from 2014 to 2020, with a planned budget of €2.3bn. It will facilitate SME access to finance, create supportive environment for business creation, help small businesses operate outside their home countries and improve their access to markets.

Other Funding Opportunities

This page lists additional research activities, initiatives executed by several Member States or joint programmes, co-funded calls, thematic opportunities, and intergovernmental actions.

Call updates

Topic: Strategies for crop productivity, stability and quality

SFS-05-2015

Topic Description Topic Conditions & Documents Submission Service

Specific Challenge: Crop productivity is determined by genetic variability and the complex interactions of the genotype (G) with its environment (E) in the context of specific management interventions (M). Understanding and capturing the dynamic of these above and below ground interactions in breeding programmes and farm management is considered as critical to address concerns over stagnating yields and yield gaps, building resilience to biotic and abiotic threats and further progress in crop improvement.

Scope: Proposals should propose smart approaches and tools to improve identification, prediction and introduction of useful genetic variation in crops, as well as favourable combinations of genotypes and management practices in a range of environments. They should tackle crop improvement in a holistic manner, and seek for novel breeding targets to improve yield, yield stability, quality, biotic/abiotic stress tolerance/resistance and environmental benefits. Activities and results should feed into breeding programmes as well as help diversifying and optimising crop management at different stages of plant development. In line with the objectives of the EU strategy for international cooperation in research and innovation, proposals are encouraged to include participants established in third countries[1]. Proposals should fall under the concept of 'multi-actor approach'[2] and allow for adequate involvement of the farming sector in proposed activities. This action allows for the provision of financial support to third parties in line with conditions set out in Part K of the General Annexes.

The Commission considers that proposals requesting a contribution from the EU in the range of EUR 3–5 million would allow this specific challenge to be addressed appropriately. Nonetheless, this does not preclude submission and selection of proposals requesting other amounts.

NMP-18-2014

[Topic Description](#)

[Topic Conditions & Documents](#)

[Submission Service](#)

Specific challenge: The recent communication 'Promoting cultural and creative sectors for growth and jobs in the EU' highlighted the competitive advantage that creative and cultural inputs bring to the European industries. The most obvious example is the wider use of design in manufacturing industries, adding value to products, services, processes and market structures. Firms spending twice the average amount on creative inputs are 25% more likely to introduce product innovations (COM(2012)537). To promote design-driven innovation, a number of action lines have been endorsed by the Commission, including integrating design into research and development and promoting new collaborative innovation strategies ('Implementing an Action Plan for Design-Driven Innovation', SWD(2013)380).

An innovative, design-driven, sustainable approach in conceiving, developing, producing, using and recycling materials can be effective in strengthening the competitiveness and success of the European creative industries linked to manufacturing (e.g. architecture, automotive, art, crafts, supports for cultural items, decoration, fashion, furniture, lighting, interior design materials and products, jewels, luxury, media supports, publishing, sport and toys), adding value to products and processes also by 'intangible' factors (e.g. trend translation, enhanced sensations, values).

Scope: Proposals should address the development of innovative material solutions for use in the creative industry sectors based on waste or process by-products to produce new materials or adopting bio-mimetic approaches. A sustainable and socially responsible approach to reduce energy consumption and environmental impact should be clearly demonstrated. Proof of concept in terms of product and/or process must be delivered within the project, excluding commercially usable prototypes (in compliance with European Commission Communication 2006/C323/01), but convincingly demonstrating scalability towards industrial needs.

Topics for the SME instrument

The dedicated SME instrument encourages for-profit **SMEs** to put forward their most innovative ideas with an EU dimension. The instrument aims to fill gaps in funding for high-risk innovation and close-to-market activities to give a strong boost to breakthrough innovation. It targets highly innovative SMEs with a strong ambition to develop, grow and internationalise. It covers the whole innovation cycle, the focus being on delivery of new products, services or processes on the market.

Only SMEs are eligible for funding, and can decide how best to organise a project or with whom to collaborate, including through subcontracting of tasks if they lack in-house capabilities. In order to boost market relevance and foster commercialisation of project results, also single SMEs can apply for support. [More...](#)

Abstract

The abstract should provide the reader with a clear understanding of the objectives of the proposal, how they will be achieved, and their relevance to the Work Programme. This summary will be used as the short description of the proposal in the evaluation process and in communications to the programme management committees and other interested parties. It must therefore be short and precise and should not contain confidential information. Please use plain typed text, avoiding formulae and other special characters. If the proposal is written in a language other than English, please include an English version of the proposal abstract in the Description of work. There is a limit of 2000 characters (with spaces).

Remaining characters 2000

Has this proposal or a very similar one been submitted in the past 2 years or is currently under preparation to be submitted for a call for proposals of any EU programme (including Horizon 2020)? Yes No

PROCESSO DI VALUTAZIONE

Cambiamenti rispetto a FP7:

- **PROPOSTE MULTI DISCIPLINARI/SETTORIALI**

- Nuovi profili di esperti
 - Call for experts pianificata a Novembre 2013
- Regole definite per il turnover di esperti;
- Più esperti per proposta;
- Procedure chiare nei casi di disaccordo degli esperti

- **RIDUZIONE TEMPI VALUTAZIONE-FIRMA GA (8 MESI)**

- Valutazione basata sul merito della proposta, senza raccomandazioni per cambiamenti sostanziali (es. Partners, etc...)
- Multi-step (valutazione bloccata al mancato raggiungimento delle soglie minime)
- Procedure semplificate per lo Strumento PMI

PROCESSO DI VALUTAZIONE

TIME TO GRANT (art.17a)

ESITO DELLA VALUTAZIONE = 5 MESI DALLA SOTTOMISSIONE
 della PROPOSTA **NEW**

FIRMA DEL GRANT AGREEMENT = 3 MESI DALLA
 COMUNICAZIONE DEGLI ESITI DELLA VALUTAZIONE (fatta
eccezione per i progetti ERC, dove l'elevato numero di proposte
 presentate potrebbe richiedere un'estensione) **NEW**

CRITERI DI VALUTAZIONE

- Come in FP7 ciascun criterio è valutato da 0 a 5, con **soglia minima per criterio di 3/5 e soglia complessiva di 10/15**

(le soglie variano per tema e a seconda se I o II stage)

- A differenza di FP7, per Innovation Action e SME instrument, il **criterio dell' IMPATTO**
 - Ha un peso ponderato di 1.5
 - È considerato per primo nel caso di pari punteggio

SELEZIONE DELLE PROPOSTE

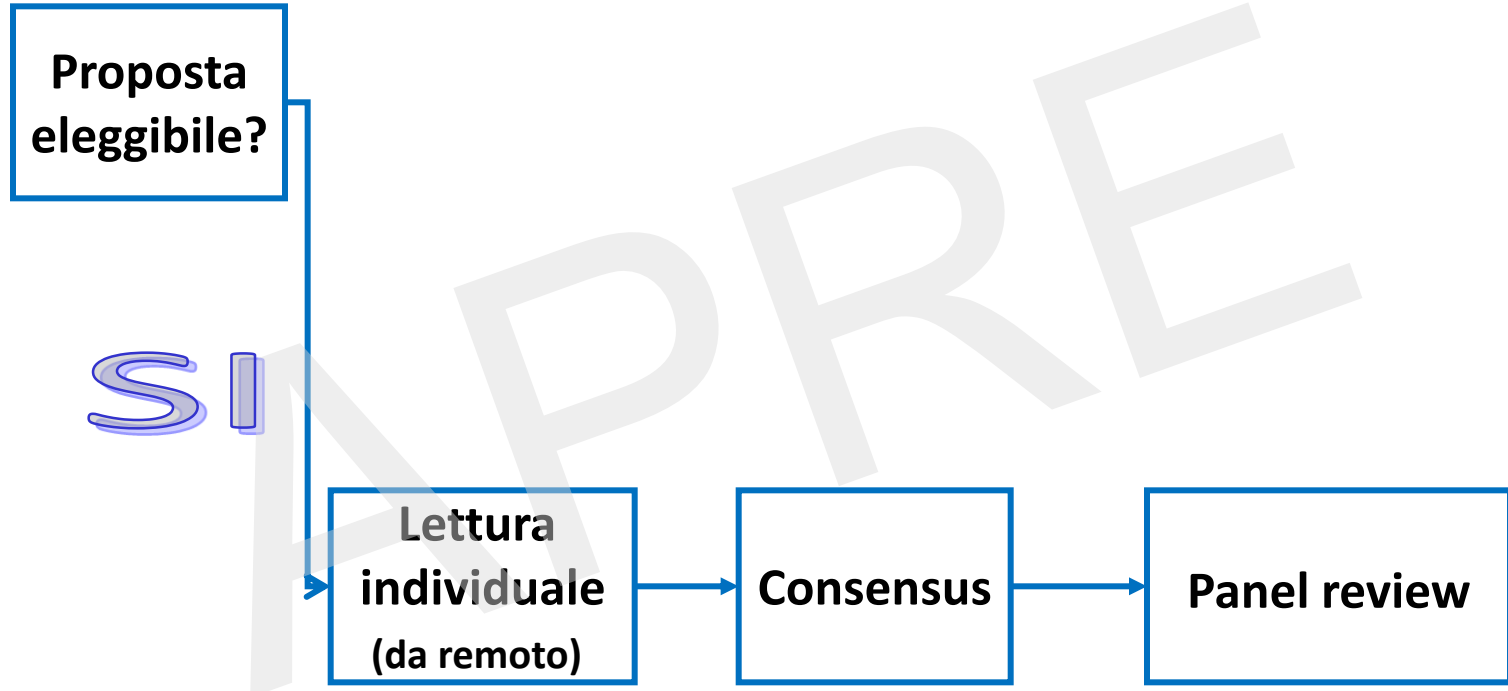

- Proposte sopra soglia (10/15) in ogni topic inserite nella **LISTA DELLE PROPOSTE POTENZIALMENTE FINANZIABILI** (in ordine decrescente)
- **PROPOSTE SELEZIONATE** a partire dall'inizio della lista finchè il budget non è esaurito

PRIORITA' PROPOSTE CON PARI PUNTEGGIO

NELL'ORDINE SI ATTRIBUISCE PRIORITA' A:

1. le proposte che riguardano topic altrimenti non coperti all'interno del WP
2. tra queste, si guarda prima al punteggio del criterio 'excellence', e poi ad 'impact'
 - *(al contrario per Innovation actions & SME instrument)*
3. se c'è ancora parità, al budget destinato alle PMI
4. se c'è ancora parità, al bilanciamento di genere del personale coinvolto
5. se c'è ancora parità, altri fattori (sinergie tra progetti, obiettivi H2020, etc...)
