Veterinaria Italiana,

Volume **45** (1), January-March 2009

Biomedical research, scientific knowledge, environmental health, public health, individual health and clinical health care will all be enhanced by implementing the 'One Medicine – One Health' concept which promotes co-equal, cross-disciplinary communication and collaboration.

The scientific coalition that evolves through this collaborative effort will significantly enhance human and animal health for future generations.

The Editors, Bruce Kaplan, DVM, Laura H. Kahn, MD, MPH, MPP & Thomas P. Monath, MD are three of the major international leaders in the One Health movement who also manage the One Health Initiative website at www.onehealthinitiative.com.

This 218-page book includes contributions from 53 of the world's top specialists in this field in a total of 13 peer-reviewed papers (see Contents opposite).
